List of Products produced with GVT material:

Products required but not produced by GVT:

List of GHV products used:

Special Requirements:

I understand that:

1. All timber purchased from Geelhoutvlei Timbers is sold voetstoots, and that I must satisfy myself as to its quality.
2. CCA timber is not re-dried after treatment and is therefore prone to warp twist and shrinkage until such time as it has reached equilibrium moisture content.
3. The sales staff at Geelhoutvlei Timbers have no professional qualification in wood technology, engineering, architecture or quantity surveying and that their function is primarily to facilitate the logistics of sale.
4. GVT rough sawn mill run timber in structural dimension is ungraded and therefore does not comply to SABS grading for structural purposes, but is treated so SABS specification.
5. No returns will be accepted by Geelhoutvlei Timbers.
